4. MGT 906 Contemporary Issues in Business Ethics
5. MGT 936 Emerging Issues in Global Information Technology
6. MGT 923 Leadership in Organizations
7. MGT 910 Advanced Managerial Communication
8. MGT 912 Management Science and Analysis

Research Methodology (12 credits)

1. MGT 905 Inquiry to Doctoral Writing
2. MGT 915 Doctoral Research Methodology
3. MGT 935 Advanced Quantitative Research and Analysis
4. MGT 945 Advanced Qualitative Research and Analysis

Comprehensive Examination (No-academic credit)

Residency Requirement (No-academic credit)

1. MGT 901 Required Residency I
2. MGT 902 Required Residency II
3. MGT 903 Required Residency III

Accounting Specialization Coursework (12 credits)

1. ACC 905 Advanced Accounting Research
2. ACC 907 Advanced Managerial Accounting
3. ACC 909 Advanced Financial Accounting Theory
4. ACC 911 Advanced Accounting Analytics

Dissertation Proposal (6 credits): MGT 951, 952, 953, 954, 955, 956

Dissertation (6 credits): MGT 960 and MGT 961

Total Hours Required 60

Specialization

— Accounting Courses

ACC 905 Advanced Accounting Research, 3 semester hours

This course aims to increase the doctoral student's exposure to empirical accounting research, improve their ability to critically evaluate research and research designs, and equip students to conduct independent empirical research. Additionally, the course provides students with a historical foundation that will enable them to understand the current state of accountancy practice and research.

ACC 907 Advanced Managerial Accounting, 3 semester hours

This course aims to promote practical, pedagogical, and research skills of doctoral students in areas of managerial accounting and decision making. Students will engage in analysis of literature involving current management accounting topics, including revenue management, activity-based management, value chain analysis, cost management, and capital budgeting, and benchmarking. Students will be required to complete several cost management projects.

ACC 909 Advanced Financial Accounting Theory, 3 semester hours

This course introduces doctoral students to financial accounting topics and empirical research. The principal objective of the course is to expose students to emerging financial accounting issues and familiarize students with various research methodologies employed in empirical financial accounting research. Student will be required to complete projects on accounting theory framework.

ACC 911 Advanced Accounting Analytics, 3 semester hours

This course aims to increase the doctoral student's exposure to advanced topics in analytics used by accounting professionals and provides a practical foundation to understand the impact of data analytics on Accounting, Auditing, and Financial Reporting. Emphasis is placed on the development of skills necessary to extract and analyze data captured through enterprise resource planning (ERP) systems to improve estimations, valuations, and facilitate optimal decisions. Students will use different analytical models.
